Metallography

An International Journal

Published in association with the International Microstructural Analysis Society

Contents: Volume 6, 1973

H. Tas (Heverlee, Belgium)
Orientation Determinations with Polarized Light 1

D. A. Aboav (Hertfordshire, England) and T. G. Langdon (Los Angeles, Calif.)
The Planar Distribution of Grain Size in a Polycrystalline Ceramic . . 9

R. J. Hussey, P. E. Beaubien, and D. Caplan (Ottawa, Canada)
The Etching of Oxide Scales on Metals 17

R. J. Hussey, P. E. Beaubien, and D. Caplan (Ottawa, Canada)
The Metallography of Oxide Scales on Metals 27

S. M. El-Soudani and R. M. Pelloux (Cambridge, Massachusetts)
A Comparative Analysis of Automated and Manual Measurements of Volume Fraction of Inclusions in Aluminum-Alloy Rolled Sheets 37

I. G. Wright (Columbus, Ohio) and J. Stringer (Liverpool, England)
On the Oxidation of Chromium-3 w/o Thoria 65

SHORT COMMUNICATION

J. Billingham and J. Lauridsen (Stoke Poges, Slough, England)
Nucleation of Sigma Phase in a Complex Nickel Base Superalloy . . . 85

LETTER

K. L. Walters, H. D. Lewis, and K. A. Johnson (Los Alamos, New Mexico)
A Fortran IV Program for Quantimet 720 Image Analysis Data Reduction . 91

Homer D. Lewis, Kenneth L. Walters, and K. Allan Johnson (Los Alamos, New Mexico)
Particle Size Distribution by Area Analysis: Modifications and Extensions of the Saltykov Method 93

Rodney Coleman (London, England)
Random Paths Through Rectangles and Cubes 103

J. A. Spittle (Cardiff, Wales, U.K.)
Lamellar and Rod Morphologies in the Zn–$TiZn_{15}$ Eutectic 115

A. Mance, V. Perović, and A. Mihajlović (Beograd—Vinča, Yugoslavia)
Potentiostatic Controlled Etching and Polishing of Copper and Its Alloys . 123

C. A. P. Horton and K. J. Goddard (Leatherhead, Surrey, England)
Examination of Grain Boundary Precipitates in Al–Fe Bicrystals Using a Gallium Embrittlement Technique 131

R. S. Irani, Fu-wen Ling, and R. W. Cahn (Brighton, England)
Domain Structures and Hardening in Ordered Ni_4Mo 141

K. K. Chawla (Rio de Janeiro, GB—Brazil)
Thermal Cycling of Copper Matrix–Tungsten Fiber Composites: A Metallographic Study 155

SHORT COMMUNICATIONS

T. Janačković, V. Petrović, D. Uskoković, and M. M. Ristić (Belgrade, Yugoslavia)
Grain Growth During the Sintering of Nb_2O_5 171
M. Sarracino (Roma, Italy)
A New Technique for the Examination of Fatigue Striations with the Scanning Electron Microscope 176
T. Schober and V. Sorajić (Jülich, Germany)
A New Method for Electropolishing Niobium for Transmission Electron Microscopy (TEM) 183

Jeff Perkins (Monterey, California)
Morphology of Widmanstätten Precipitates at Early Stages of Development . 185
L. Priester et M. Aucouturier (Centre d'Orsay, France)
Mise en Evidence par la Méthode Potentiocinétique du Rôle Eventuel de la Diffusion dans les Transformations des Alliages Fer-Nickel de 0 à 30% de Nickel 195
M. D. Petrov (Sofia, Bulgaria)
Verfahren für electronenmikroskopische Untersuchung von Metallen und Legierungen mittells Abdruck nach thermischer Ätzung 237
R. J. De Angelis (Rio de Janeiro, GB-Brazil)
A Computer x-ray Monochromator 243
G. Petzow and H. Knosp (Stuttgart, Germany)
Application of Microreflection in Metallography 249

SHORT COMMUNICATIONS

William DuBroff and Norman A. Robins (East Chicago, Indiana)
Comments on the Use of "Random" Samples in Inverse Pole Figure Studies 261
A. M. Siddiqui and H. McArthur (Leicester, England)
Preparation of Direct-Replica of Steel Specimens 265
R. S. Gates and R. N. Stevens (London, England)
Internal Markers for Grain Boundary Sliding Measurements 269

BOOK REVIEW

P. Lacombe (Centre d'Orsay, France)
Méthodes et techniques nouvelles d'observation en Métallurgie Physique, Bernard Jouffrey, Ed. 273

C. Hays and E. G. Kendall (College Station, Texas)
An Analysis of Knoop Microhardness 275
I. G. Davies, K. Haslam, and M. Randle (Sheffield, England)
Contact Micro-Radiography and its Application to Inclusion Studies . . 283
E. Legrand-Bonnyns and A. Ponslet (Bruxelles, Belgium)
Determination de l'Orientation des Grains d'un Polycristal a Partir de la Structure Revelee par l'Attaque Thermique 295

V. Chandrasekaran, R. Taggart, and D. H. Polonis (Seattle, Washington)
Decomposition Processes Prior to Detection of the Omega Phase in Aged Ti-Cr Alloys 313
B. M. Strauss (Pittsburgh, Pennsylvania)
Techniques for Correlating Areas in the SEM and TEM 323
S. W. Mahajan, G. Venkataraman, and A. K. Mallik (Bombay, India)
Grain Refinement of Steel by Cyclic Rapid Heating 337
Ross J. Jackson (Golden, Colorado)
Metallographic Study of Segregation in Uranium-Base Niobium Alloys . . 347

SHORT COMMUNICATIONS

Victor A. Phillips (Oxford, England)
Lattice Structure in 1800°C Processed Vitreous Carbon 361
Robert W. Burns (Seattle, Washington)
Method for Optically Aligning Small Specimens 365

M. Conserva, E. Di Russo, and A. Giarda (Novara, Italy)
and J. Waldman (Philadelphia, Pennsylvania)
Influence of Ingot Processing on the Structure of As-Cast Al-Zn-Mg-Cu-Cr Alloy 367
R. Chandrashekar and K. I. Vasu (Bangalore, India)
Morphology of Stress Corrosion Cracks and Crack Branching in Aluminum–Magnesium Alloys 377
P. Van Houtte, E. Aernoudt, and L. Delaey (Heverlee, Belgium)
Some Applications of a Minicomputer in Metal Lattice Research . . . 393
G. Maeder, Mlle C. Servant, P. Lacombe, and C. Cizeron (Centre d'Orsay, France)
Evolution Structurale de L'Acier Maraging Soumis à des Cycles Thermiques Cumulés à Vitesse Rapide 405

SHORT COMMUNICATIONS

M. R. Krishnadev, L. Delage, A. Galibois (Quebec, Canada), and I. Le May (Saskatchewan, Canada)
The Use of the Isothermal Internal Friction Technique to Study Precipitation in a Copper-bearing Steel 425
S. K. Bhambri (Bangalore, India) and, P. Audit (Metz, France)
Effect of Surface Oxides on the Quality of Pseudo-Kikuchi Patterns in the Scanning Electron Microscope . . . 429
R. Darolia and T. F. Archbold (Seattle, Washington)
(Arc Melting and Homogenization of ZrC and ZrC+B Alloys . . . 433

LETTER

R. J. De Angelis (Lexington, Kentucky)
Automatic Plotting of Reciprocal Lattice Zones 439

Editorial 443
Michail D. Petrov (Sofia, Bulgaria)
Elektronenmikroskopische Untersuchung über den Keimbildungsmechanismus bei der Rekristallisation von verformtem technisch reinem Kupfer . . . 445
Steven P. Tucker and Frederick G. Hochgraf (Durham, New Hampshire)
The Equilibrium Morphology of Grain Boundary Phases 457
D. R. Barraclough (Sheffield, England)
Etching of Prior Austenite Grain Boundaries in Martensite 465

MICHAEL F. EHMAN, D. MEDELLIN, AND G. W. JOHNSON (Anaheim, California)
Chemical and Mechanical Preparation of BeO Crystal Surfaces . . . 473
B. L. BRAMFITT AND A. R. MARDER (Bethlehem, Pennsylvania)
A Transmission Electron Microscopy Study of the Substructure of High Purity Pearlite 483
M. H. RICHMAN, A. P. LEVITT, AND E. S. DI CESARE (Providence, Rhode Island)
Exfoliation of Magnesium-Graphite Composites: A Combined Metallographic and Analytical Approach 497
W. WALLACE, R. T. HOLT, AND T. TERADA (Ottawa, Canada)
The Nature of the Sulfo-Carbides Observed in Nickel-Base Superalloys . . 511
B. PRASAD AND A. K. MALLIK (Bombay, India)
Effects of Preprecipitation on the Precipitation Behavior of Al-Zn-Mg Alloys . 527

SHORT COMMUNICATION
D. J. GOULD (Endicott, New York)
Ion Machining Ceramics for Transmission Electron Microscopy . . . 539
Author and Title Indexes to Volume 6 543
